Quickfind Code: 1050

Part Number: SALE OF 2 TIER RACKING FOR 10FT

£482.00 (exc. VAT)

£578.40 (inc. VAT)

PRODUCT DETAILS

For a 10ft container we offer a single 2250mm bay of two tier racking that can be assembled in the container. This racking kit can also be used in 20ft, 30ft and 40ft containers.

It comprises two pre-assembled 2m high and 600mm wide end frames connected by two beams per shelf. The beams easily slot into the end frames and include safety clips.

All steel items are powder coated (blue and orange) for a scratch resistant finish and include a 25mm chipboard shelf with a capacity of 550kgs per shelf. The shelf level heights can be adjusted in 50mm increments.

It is possible to use racking on both sides of a 10ft container. However there is not enough room to fit racking on the end wall.

This single bay racking kit is for a single side. Order 2 kits to fit both sides.

10ft Container – Maximum Bays Per Side: 1

20ft Container – Maximum Bays Per Side: 2

40ft Container – Maximum Bays Per Side: 5
