

ECO FOUNDATION PADS (SET OF 4)

Quickfind Code: 1039

Part Number: SALE ECO FOUNDATION PADS

£95.00 (exc. VAT)

£114.00 (inc. VAT)

PRODUCT DETAILS

These 400mm x 400mm x 50mm thick pads are made from recycled plastic and available in sets of 4.

They can be used as a quick, easy and long lasting pad to place and spread the load from jacklegs or under the four corners of steel cabins or containers when cabins are placed on soft or unmade ground.

The foundation pads can also be used in more extreme levelling situations where there is a significant fall or step to make up or to raise the cabin or container up higher.

The foundation pads reduce the risk of subsidence and movement after delivery and when stacked.

APPLICATIONS OF THE ECO PADS INCLUDE

- Portable Containers
- Portable Toilets
- Storage Units
- Park Model Trailer Homes
- Garden Buildings (sheds, offices)
- Lifting Equipment (mobile cranes)
